Lecture – Gamblin Conservation Colors: Challenges and Perspectives

By Robert Gamblin,
Founder of Gamblin Artists Colors and Conservation Colors

At Cologne Institute of Conservation Sciences, TH Köln
in collaboration with Deffner & Johann

CICS

Cologne Institute of
Conservation Sciences

Fakultät für
Kulturwissenschaften

Technology
Arts Sciences
TH Köln

A talk by Robert Gamblin about 20 years of history, experiences and perspectives in the making of Conservation Colors.

A short reflection of the science behind the development of Gamblin Conservation Colors, will be followed by an introduction how the inpainting color is made, and a tour through materials, intended application and characteristics. A focus will be given to the working properties and application tips, including hue, transparency/opacity, and viscosity.

Tuesday, May 23, 2023 / 10:00 am
CICS, Köln, Ubierring 40, Room 137 and
ZOOM-LINK (hybrid)

The talk will be followed by a 30 min Q&A session
Free and open to the public, no registration required

Robert Gamblin is a painter and paint manufacturer. In 1980 he founded Gamblin Artists Colors Co. and subsequently researched historical paints. From 1995 to 2000 he developed with René de la Rie, Mark Leonard, Jill Whitten the in-painting color that became Gamblin Conservation Colors.
