

IPG Photonics is the world's leading provider of high power fiber lasers and fiber amplifiers that are revolutionizing performance and utility in a remarkable array of materials processing.

For the expansion of our Service Group in Prague, Czech Republic, we are looking for a

Service technician Czech Republic (male/female)

Your tasks:

- Installation and commissioning of the lasers at our customers' places
- Demonstrations, instructions and customer training
- Resolution of technical problems occurring with disorders or failures at our customers' locations
- Answering customer's questions at our service hotline

Training takes place at our location in Burbach (NRW, Germany)

Your profile:

Beside a suitable qualification in electronics or mechatronics, you have an in-depth knowledge of electronics, analog and digital technology.

You are willing to travel within Czech Republic, Slovakia and occasionally to other countries. You own a driver's license and have good communication skills in Czech and English language. You are a team player with strong organizational and communication skills.

If you are searching an interesting and challenging position in a demanding technical surrounding, we are looking forward to your written application in German or English language, including a CV, school records, job references, earliest possible date of entry and salary expectations. Please note that we can only process complete application documents.

Please send your application to bewerbungen@ipgphotonics.com or to
