Examination Periods	There is one examination period in the winter semester (in January) and two examination periods in the summer semester: at the end of the lecture period (July) and at the end of the semester break (September).

II How to select your courses

Step-by-Step Guide

1. Choose the modules you would like to enrol for

The [module catalog](#) provides you with all the necessary information about your program and the [study plan](#) gives you an overview of the offered modules and the semester in which they take place. Please note that some modules may only be offered in a certain period: 1st and 3rd offered in summer, 2nd only in winter. An English translation and other useful information can be found in the **List of Modules** below.

2. Consult the general timetable

The timetable is published approximately one month prior to the beginning of the lectures on the learning platform ILIAS. Since you only get access to the learning platform after you have received your student ID, you may kindly ask [Prof. Dr. Krupp](#) (see list above) to send you the timetable. If you have difficulties recognizing the German names of the modules in the timetables, please consult the **List of Modules** below. As soon as you are enrolled, you will be able to find the timetables on the "[For students](#)" website by clicking on "to the timetable".

3. Create your own timetable

In addition to the obligatory modules there are optional modules, so called electives. Please keep in mind that not all of them are offered in both semesters and that the number of participants is limited. Those modules are marked as *optional* in the **List of Modules**. International students should enquire free capacity by contacting the lecturers via email. You can find their names in the module catalog and their contact details in the official [list of staff](#) (*Personen*) of TH Köln.

If you need any further information please consult the official website of the study program [M.Sc. Supply Chain and Operations Management](#) or the website of the [International Office of the Faculty](#).
