# Developer and Co-Founder (f/m/d) @Blockball

#blockchain #startup #webdevelopment #dApps #AI #databases

## About Us

***Blockball, a startup that reinvents the world of football is looking for a full-stack-developer and technical Co-Founder***

Inspired by the movie moneyball, we are developing the technology that let's football clubs build game-winning teams, the most loyal fan bases as well as find the best talent with the help of Artificial Intelligence and Blockchain Technology.

Blockball is a pre-seed startup with 3 team members. The team has professional backgrounds in blockchain, UX/UI, branding, marketing and football, knowing the pains of the football industry as well as the gains that blockchain and AI will bring to the space. Those who join the team prior to the Company's expected founding in 2020 can become founding members.
